Instruction 1: Draw equal shape below the dotted line.

Instruction 2: Draw equal shape on a blank paper.

Instruction 3: Look at the shape for five seconds, then cover it. Draw an equal shape on a blank paper.

Instruction 1: Draw equal shape below the dotted line.

Instruction 2: Draw equal shape on a blank paper.

Instruction 3: Look at the shape for five seconds, then cover it. Draw an equal shape on a blank paper.

Instruction 1: Draw equal shapes below the dotted line.

Instruction 2: Draw equal shapes on a blank paper.

Instruction 3: Look at the shapes for ten seconds, then cover them. Draw equal shapes on a blank paper.

Instruction 1: Draw equal shapes below the dotted line.

Instruction 2: Draw equal shapes on a blank paper.

Instruction 3: Look at the shapes for ten seconds, then cover them. Draw equal shapes on a blank paper.

Instruction 1: Draw equal shapes below the dotted line.

Instruction 2: Draw equal shapes on a blank paper.

Instruction 3: Look at the shapes for ten seconds, then cover them. Draw equal shapes on a blank paper.

Copying activities stimulate child's eye - hand coordination. When children draw different geometric shapes their brains compare evolving drawings with original shapes. This process strengthens visual-motor integration and fine-motor hand and fingers movements control.

Activities and tasks in this workbook strengthen shape and size constancy concepts by asking children to copy different geometric shapes progressing from basic shapes such as circles, squares, and triangles to more complicated shapes and forms. These activities stimulate acquisition of basic graphomotor, fine-motor and pre-writing skills and competences which later play an important role in development of writing and other important fine-motor skills.

## What the science says about visual motor training?

### Science fact:

Visual-motor exercises create functional connections among visual and motor regions in brains.

### Science fact:

Interrelation between fine motor skills, non-verbal intelligence and executive functioning.

### Science fact:

Visual-motor exercises improve graphomotor skills which are important predictors of later academic achievement.

EXTENSIVE  
collection

of TASKS and  
ACTIVITIES

for  
EVERY child

and for  
children with  
DIFFICULTIES

designed by  
EXPERTS

for PARENTS  
and EXPERTS

## About BrainscribED Workbooks Collection

A **comprehensive** collection of **5.600 +** worksheets and **30.000 +** activities aimed at helping the development of visual-motor integration and graphomotor skills in children.

Visual-motor integration development is stimulated by **fun** and **user friendly** activities tailored for children at different developmental stages and levels of skills.

**Every** child's visual motor integration and skills development can **benefit** from graphomotor/visual-motor tasks and training at home or in a classroom.

Teachers and other professionals working with children with visual motor integration problems or/and with writing problems will find a plentitude of useful and engaging tasks for a **systematic intervention** in BrainscribED workbooks.

BrainscribED workbooks provide **parents** with developmentally appropriate and gradually challenging tasks for their children as well as they offer **teachers** and other **experts** (preschool, school, special education, therapy, etc.) appropriate and gradually challenging tasks according to developmental needs of their children.

## Types of BrainscribED Activities
